**Spring into CAR CARE!**

THE MILLION-DOLLAR Can you use your winter

As you begin your spring car care, it's time to think about the winter damage you've done to your car. The good news is that you can prevent more damage by taking care of your car now. Here are some tips to help you get your car ready for spring.

**ADAPTING TO DRIVING CONDITIONS**  
When you're driving in winter, you need to be extra careful. The roads are icy, and the weather is unpredictable. You need to take extra precautions to keep yourself and your passengers safe. Here are some tips to help you adapt to driving in winter.

**PROTECT YOUR CAR**  
Winter weather can be harsh on your car. The cold can cause the battery to die, and the salt can rust the car. You need to take steps to protect your car from winter damage. Here are some tips to help you protect your car.

**GET ROAD READY**  
If you're planning to drive in winter, you need to make sure your car is ready. You need to check the oil, the battery, the tires, and the brakes. You also need to make sure you have winter tires. Here are some tips to help you get your car road ready.

**It's time to wash your car!**  
After a long winter, your car is probably covered in dirt and grime. It's time to wash your car. Washing your car can help you remove the dirt and grime, and it can also help you protect your car from rust. Here are some tips to help you wash your car.

**WAXING THE OUTSIDE**  
Waxing your car can help you protect it from the elements. It can also help you make your car look better. Here are some tips to help you wax your car.

**CHANGE THE OIL**  
Changing the oil in your car is one of the most important things you can do to keep your car running. It can help you reduce wear and tear on the engine, and it can also help you improve the fuel economy. Here are some tips to help you change the oil.

**VEHICLE MAINTENANCE**  
Check your car's fluids this spring!

As the weather warms up, it's time to check your car's fluids. The fluids are what keep your car running, and they can get low over the winter. Here are some tips to help you check your car's fluids.

**Engine oil**  
The engine oil is what lubricates the engine. It can get low over the winter, so you need to check it. Here are some tips to help you check the engine oil.

**Brake fluid**  
The brake fluid is what makes the brakes work. It can get low over the winter, so you need to check it. Here are some tips to help you check the brake fluid.

**Power steering fluid**  
The power steering fluid is what makes the power steering work. It can get low over the winter, so you need to check it. Here are some tips to help you check the power steering fluid.

**Transmission fluid**  
The transmission fluid is what makes the transmission work. It can get low over the winter, so you need to check it. Here are some tips to help you check the transmission fluid.

**Washer fluid**  
The washer fluid is what makes the windshield wipers work. It can get low over the winter, so you need to check it. Here are some tips to help you check the washer fluid.

**Properly inflated and balanced tires: benefits galore**  
The importance of your vehicle's tires cannot be overstated. They are the only point of contact between your car and the road. Properly inflated and balanced tires can improve your car's performance, safety, and fuel economy. Here are some tips to help you properly inflate and balance your tires.

**Checking your air conditioning in spring just makes sense!**  
As the weather warms up, you'll want to make sure your car's air conditioning is working. Here are some tips to help you check your car's air conditioning.
